

NanoSafe Battery Update

**California Air Resources Board Zero Emission Vehicles Symposium
Sacramento, CA
25-27 September 2006**

Preparation for this event has been fast-paced over the last month with the Altairnano Anderson team assembling the needed battery modules. Here is the Anderson, Indiana team ready to ship the modules:

The modules were shipped to Boshart Engineering where they were assembled into the battery pack by the Altairnano team:

After integrated module testing the pack was then wheeled up to the SUV and tested prior to installation. The testing was conducted by the Altairnano, Boshart and Phoenix combined engineering team:

Then the pack was placed in the SUV and the vehicle road tested.

Now it's ready for the ZEV symposium in Sacramento:
